

SALMA HAMMOUDA

AI & Software Engineer

✉ salma.hammoouda@gmail.com 📍 Alexandria, Egypt 🔗 [linkedin.com/in/salmamedhatismail](https://www.linkedin.com/in/salmamedhatismail)

SKILLS

Skills: Frontend Development, AI Automation & Gen AI, Data & Visualization, Video Editing, UI/UX Design

Programming Languages: Python, JavaScript, HTML5, CSS3, C++

Frameworks & libraries: FastAPI, React, Node.js, Langchain, Matplotlib, Pandas, Numpy, Scikit-Learn, Scipy

Tools: Git / Github, SQL, Power BI, After Effects, Figma, n8n

EXPERIENCE

AI Engineer Intern

02/2026 – 04/2026

Proglyft (Early-Stage Startup)

Remote

- Built an AI exam generator with FastAPI, RAG pipelines, and LLM (Groq).
- Implemented context-aware retrieval using ChromaDB and SentenceTransformers.
- Developed an AI chatbot for career advice and platform queries via Groq API and prompt engineering.

IT intern

08/2025 – 08/2025

ABU QIR Fertilizers and Chemicals Industries

Alexandria, Egypt

- Observed enterprise IT infrastructure including SAP, Oracle APEX, and cybersecurity practices.
- Gained familiarity with how software systems and data management workflows operate at an industrial scale.

COURSES

Microsoft Machine Learning Engineer track

07/2026 – Present

Digital Egypt Pioneers Initiative (DEPI)

Alexandria, Egypt

- Training in Microsoft Azure-based data science, covering the ML pipeline from raw data to scalable, deployable models
- Coursework spans Python for Data Science, Machine Learning, Deep Learning, NLP with Attention Models, and Computer Vision & Transfer Learning
- Building hands-on experience with Azure AI Fundamentals, Azure AI Engineer Associate tools, and MLOps (MLflow, Hugging Face)

AI & LLM

06/2026 – 07/2026

Tips Hindawy (Edrak for Ai)

Online

- Completed a hands-on AI/LLM program covering prompt engineering, RAG, embeddings, and model fine-tuning/optimization
- Gained practical experience with LangChain, vector databases (ChromaDB), and multi-model LLM integration (Groq/Mistral)
- Applied these skills to build KalemlyAI, a RAG-powered AI customer support chatbot no-code builder

Web Development Track

07/2025 – 11/2025

Digital Egypt Pioneers Initiative (DEPI)

Alexandria, Egypt

- Training in HTML, CSS, JavaScript, React, NodeJS, Git/GitHub, Docker, TypeScript, and UX/UI through real-world projects
- Graduation project (Nominated for Best Project): A car rental platform delivering a responsive web app; Worked on the front-end and integrated a chatbot

EDUCATION

Student in Computer Science

07/2024 – Present

Egypt-Japan University for Science and Technology - EJUS

Alexandria, Egypt

- Current GPA: 3.41
- Currently pursuing an AI and data science degree with a focus on programming, AI, Software Engineering, and algorithms
- **Clubs joined;** MUN club, Organization club, Robotics club.

PROJECTS

KalemlyAI 	07/2026
AI Customer Support Chatbot No-Code Builder Tips Hindawi Challenge	
• Built a platform enabling businesses to generate bilingual (Arabic/English) support chatbots from custom knowledge bases (PDF, DOCX, TXT, URLs), using Next.js 16, LangChain, Groq LLM, and ChromaDB • Implemented an automatic multi-model LLM fallback chain and hybrid retrieval • Added multi-turn conversation memory, human escalation workflows, and an embeddable website widget	
Autobrief 	12/2025
GDG EUI Hackathon AI-Powered Client Brief Automation Platform	
• Built a full-stack AI brief-generation platform using Next.js, Supabase, FastAPI, and Groq API. • Implemented multi-input processing for text, audio, and images, with AI filtering, transcription/OCR, and brief generation, got excellent impressions from judges.	
Doctor Appointment & Teleconsultation Web App 	11/2025 – 12/2025
• In a team of two, Built a full-stack platform with React 19 + Next.js 15, enabling role-based access for patients, doctors, and admins. • Led backend development, implementing scheduling, video calls (Vonage SDK), payments (NeonDB + Prisma), and secure Clerk authentication.
